

NOBERT LANGAT

Full-Stack Developer

Nairobi, Kenya • +254 729 453 045 • nobertlangat0@gmail.com

nobertdev.vercel.app • github.com/NOBERT167 • linkedin.com/in/nobert-langat-ab44661ba

PROFESSIONAL SUMMARY

Full Stack Software Developer with **3+ years** of professional experience delivering secure, scalable enterprise web applications across the full technology stack. Specializes in integrating modern **React** and **Next.js** frontends with **ASP.NET Core (C#)** and **Node.js** backends. Experienced in **relational** and **non-relational database** design, **RESTful** and **GraphQL** API development, and live payment integrations. Enforces **OWASP** security standards, manages **CI/CD pipelines**, and participates actively in Agile Scrum delivery. Comfortable working across the full development lifecycle — from requirements and architecture through testing, deployment, and production support — in both greenfield and legacy modernization contexts.

TECHNICAL SKILLS

Backend: Node.js, Express.js, ASP.NET Core (C#), RESTful API design, GraphQL, OData, SOAP, micro services patterns, event-driven architecture

Frontend: React.js, Next.js, TypeScript, Tailwind CSS (supporting knowledge)

Databases: MongoDB, MySQL, SQL Server, PostgreSQL, SQLite

Security: OWASP standards, JWT authentication, OAuth2, role-based access control, input validation, rate limiting, Helmet.js, CORS

Languages: JavaScript (ES6+), TypeScript, C#

DevOps & Tools: Git & GitHub, GitHub Actions, Jenkins, Docker, Google Cloud Build, AWS, Vercel, CI/CD pipelines

Testing: Vitest, Jest, unit & integration testing, TDD

Methodology: Agile/Scrum, remote collaboration, technical documentation

PROFESSIONAL EXPERIENCE

Full-Stack Developer - Greencom Enterprise Solutions — Nairobi, Kenya (June 2024 – Present)

- Modernized legacy ASP.NET Framework MVC applications by migrating to ASP.NET Core + React.js (TypeScript, Tailwind CSS, and ShadCN), improving maintainability, performance, and user experience.
 - Designed and built secure, scalable RESTful APIs using ASP.NET Core enforcing OWASP security standards, role-based access control, and input validation across all endpoints.
 - Built an AI-powered OData MVC code generator that automates production-ready ASP.NET MVC scaffolding from Business Central schemas — cutting development time by 85%.
 - Maintained legacy ASP.NET MVC portals and jQuery-based frontends, resolving bugs and shipping incremental feature improvements.
 - Integrated enterprise web portals — Employee Self-Service, E-Recruitment, E-Procurement, and CRM — with Microsoft Dynamics 365 Business Central ERP via OData REST and SOAP APIs, serving thousands of end-users across multiple client organizations.
-

ICT Technician Holy Trinity Kimatiso Parish — Bomet, Kenya (May 2023 – June 2024)

- Designed and developed a database system to digitize and manage organizational records, improving retrieval efficiency and reducing manual processes.
 - Provided day-to-day ICT support including hardware troubleshooting, software configuration, and user training.
-

ICT Intern - Bomet University College — Bomet, Kenya (Sept 2022 – Dec 2022)

- Supported IT team with network infrastructure optimization, server management, hardware maintenance, and **web development** — gaining structured exposure to enterprise IT operations.
 - Contributed to an open-source **GitHub** project, demonstrating collaborative technical practice and version control discipline.
-

FEATURED PROJECTS

DevPulse — Full Stack Community Blog Platform

[Demo](#) • [GitHub](#)

Full-stack developer community blog platform built with Node.js, Express 5, MongoDB, and React 19 + TypeScript. Features include AI-powered post generation via OpenAI GPT, Clerk authentication with role-based access control, Cloudinary image uploads, Docker containerization, and Google Cloud Build CI/CD. Demonstrates end-to-end backend architecture, API security (Helmet, rate limiting, CORS), and production deployment discipline.

AI-Powered OData Code Generator

[Demo](#) • [GitHub](#)

React + ASP.NET Core tool that generates production-ready MVC code from Business Central OData schemas. Demonstrates end-to-end .NET application development, API integration, and developer tooling automation. **Reduced scaffolding time by 85%.**

@nobertdev/react-confirm-dialog

[npm package](#) • [Docs & Demo](#)

Lightweight, fully customizable React confirmation dialog hook. Zero dependencies, fully accessible, published on npm.

@nobertdev/react-spotlight-search

[npm package](#) • [GitHub](#)

Zero-dependency React command palette with fuzzy search, keyboard-first navigation, grouped actions, and full ARIA accessibility. ~4kB gzipped. Published on npm.
